KLEAN-KUT HP FLOOR STRIPPER IS RECOMMENDED WHEN USING THE FUSION REJUVENATOR DESIGNED WITH A STRIPPING INDICATOR.

INTEGRATION HP FLOOR STRIPPER IS RECOMMENDED FOR ALL CONVENTIONAL FLOOR FINISHES. AN INTEGRATED STRIPPING INDICATOR ENSURES OPTIMAL PRODUCT USE.

## HIGH-PRODUCTIVITY SOLUTIONS

for large premises with intense traffic

ACTION	FEATURES	BENEFITS
<b>PRODUCT</b> <b>PROTECT</b>		
<b>FUSION (3830)</b> 	<p>Adheres efficiently to floor coverings. It also improves floor finish adherence by 30% to 50%.</p> <p>Extends the useful life of floor coverings.</p> <p>Facilitates stripping operations.</p>	<p>Superior protection. Reduces floor covering replacement costs.</p> <p>Reduces floor covering replacement costs.</p> <p>The stripping indicator ensures that stripping is complete. Eliminates the need to redo work caused by inadequate stripping results. Saves time and reduces labour costs.</p>
<b>PROTECT</b>	<p>Floor finish with high solid content (25%).</p>	<p>Each coat offers better protection. Reduces the number of coats to apply. Saving on product purchase and reduction of labour costs.</p>
<b>MAXIMUS (3399)</b> 	<p>Easily applicable and self-levelling floor finish.</p> <p>Very durable.</p> <p>Floor finish designed for a high frequency maintenance. Does not powder.</p>	<p>Eliminates the need to redo work due to the orange peel effect and fringe marks during application of the floor finish. Time saved on application. Saving on product purchase and reduction of labour costs</p> <p>Reduces frequency of recoating. Saving on product purchase and reduction of labour costs.</p> <p>Can tolerate 4 to 7 high-speed polishings per week. Allows creation of a clean and pleasant environment with minimum labour.</p>
<b>CLEAN</b>	<p>A single product for cleaning and scrubbing.</p>	<p>Reduces the investment by eliminating the need to have a specific scrubbing product in stock.</p>
<b>KLEANMAX (3412)</b> 	<p>KLEANMAX does not damage the floor finish during scrubbing.</p>	<p>Allows you to proceed only with polishing instead of recoating. Reduces the recoating frequency and therefore postpones stripping and reduces its frequency. Saving on product purchase and reduction of labour costs.</p>
<b>STRIP</b>	<p>High-performance stripper for use on conventional floor finishes.</p>	<p>The stripping indicator ensures that stripping is complete. Eliminates the need to redo work caused by inadequate stripping results. Saves time and reduces labour costs.</p>
<b>INTEGRATION HP (3711)</b> 	<p>1-STEP stripper: strips efficiently, quickly and deeply.</p> <p>Weak odour.</p>	<p>Eliminates the need to redo work caused by inadequate stripping results. Saves time and reduces labour costs.</p> <p>Allows floor stripping near occupied premises without interrupting everyday activities. Pleasant environment after stripping operations: absence of unpleasant odours. Saves time and labour costs.</p>
<b>STRIP</b>	<p>High-performance stripper to be used with FUSION floor surface rejuvenator and conventional floor finishes.</p>	<p>Optimizes stripping results while minimizing the costs related to the job.</p>
<b>KLEAN-KUT HP (3752)</b> 	<p>Strips floors efficiently, quickly and deeply.</p> <p>Weak odour.</p>	<p>Allows floor stripping near occupied premises without interrupting everyday activities. Pleasant environment after stripping operations: absence of unpleasant odours. Saves time and labour costs.</p>
<b>RESTORE</b>		
<b>FLASH-UP HP (3389)</b> 	<p>Enhances the shine.</p>	<p>Repairs floor finishes altered by intense traffic and restores in a single operation, in a short time, with minimum labour. Reduces frequency of recoating. Saving on product purchase and reduction of labour costs.</p>
